

SPIRITUAL THREATS AND THE NEED TO PREVENT THEM

Ulugbek Saliev

Associate Professor, Fergana Medical Institute of Public Health,
Uzbekistan, Fergana City

Abstract:

Today, when globalisation processes are gaining momentum, ideological, ideological, spiritual threats remain one of the greatest risks to the future of our country. Today, when the achievements of Science, Technology are developing, such threats are becoming more dangerous. Inability to perceive or ignore ideological, ideological, spiritual threats in a timely manner can lead to situations in which it is difficult to correct.

Keywords: spirituality, upbringing, civil society, Social Protection, Information Culture.

Introduction

It is known to all of us that disasters such as international terrorism, religious extremism, narcoaggression and AIDS, which currently pose a great threat to human life, are also a Real disaster on people's lives. But today there are also serious risks that not everyone knows, that are clearly inconspicuous, that are aimed at deriving our manic life, that are dangerous in that they exclude a person from their identity, fill the manic world with vices of Abyss, ignorance, and even exclude human life. The various threats, dangers aimed at putting human manavity in its own self – esteem are so intense and with great force entering the life of society under the influence of processes of gross globalization, masked by news in the world of information that not everyone can understand their irreparable harm, only people who think widely, understand the essence of this destructive, dangerous disaster.

There should be no emptiness in the spiritual life of society, just as there is no emptiness in nature, the emptiness caused by the policy of the invaders aimed at the loss of our national spirituality during the years of dependence was filled with such vices as constipation, perversion, savagery, instead of human qualities. The eradication of such vices and spiritual poverty led to the disappearance of such qualities as kindness, nationalism, and self-sacrifice from our people. The main way to prevent ideological, ideological, spiritual taxidermy is to achieve national and spiritual recovery, increase national spirituality.

RESEARCH METHODOLOGY

Looking around, we can see that as a result of such taxdids, spiritual losses are taking place in some regions of the world, the spiritual legacies of the entire chieftain nations that have accumulated over the centuries are disappearing, their lifestyles, national mentality are falling out of the way.

The most dangerous aspect of ideological, ideological, spiritual taxdids is that it quenches the love of members of society, first of all, young people for their homeland, people, nation,

distracting them from the ideas of nationalism, patriotism in them, turning them into indifferent people.

The danger of the threats to manawiya is that destructive forces are aiming at themselves, first choosing the most dear, the greatest wealth of all of us, our dark-eyed youth, various masks, with the so-called freedom of speech and thought, freedom of Man and society in the first goal, trying to distract their minds, to occupy their still murgak hearts through modern methods and Means. As much as possible, they strive to instill their ideology and Idea, instilling in the minds of young people a mood of infertility, disrespect for national values that have formed over the centuries. During the history of mankind, during the formation of each Hulk, his national spirituality, culture also found its own form – shamoyil. In the chapter on spirituality, eastern and western views arose. Each polar spirituality has its own tamons, which also have a disproportionate number of tamons. The rich possibilities and virtues of Western spirituality, such as eastern manawism, continue to enrich the spiritual world of today's Western world. Today, as views associated with Western spirituality, such concepts characteristic of the last period of development have appeared, unfortunately, some of them even today manifest themselves as an ideological threat to Eastern spirituality, aggression, shaking the hearts of healthy spiritual people in the Western world. Even the destructive forces of the West itself, which today feel helpless, promote and encourage such vices to the world that, at the heart of these agitations, ideas of human spirituality, morality, ties with the interests of the nation lie in danger of the fate of a whole people, a nation, the life of a future generation.

Today we can give an example of such vices as "mass culture", individualism, egocentrism, which are promoted and encouraged by the term destructive forces as vices that concern people with soglom spirituality in the world.

At the same time, taking a look at the origins of the concept of "mass culture", this concept appeared in Western countries in the late 19th and early 20th centuries. "Mass culture" is based on the promotion of intimate human desires and the idea of greater pleasure. It is intended to satisfy the human lust with the help of means of love, fashion and entertainment. For example, the 50 – 60s of the 20th century were seen as a value. The result was a series of treatment in the West itself: a sharp decline in fertility, a desecration of the family, and an infection of respect for the woman. Today, in the West, under the influence of "popular culture", the social institution called the family is losing ground. Even in the fact that a number of Western countries are ranked among the "aging countries", there is no influence, no contribution of "mass culture".

RESEARCH RESULTS

Spreading and covering the Earth like a scourge, unfortunately, attracting thousands of young people, combining ideas contrary to national morality and democratic values, and even vice versa vices and deeds to humanity, in Western terms, "mass culture" is today a subject of various debate. "Scholars and intellectuals use the phrase in a positive and negative sense. In a positive sense, this concept expresses the appearance of folk oral creativity, traditions and values. In the negative sense, however, the mercenary is a set of Ideas, Ideas, habits that are conceived from the end, which are forcibly tucked into the minds of others.

One of the ugliest vices of "popular culture", one of the more ambitious ideas that has advanced, is the idea of entertainment. By the idea of entertainment, it is also possible to understand that a person is a little distracted from his marital worries, to spend his Bush time meaningfully, if we interpret it impartially, sincerely. Any healthy spiritual person seeks to engage in activities that benefit himself and others, while using every moment of his life wisely. In pure intention, with Noble training, they try to make good use of their free time, their talent, ability. But the idea of Entertainment, which we are talking about on this topic, is characterized in its own way by the fact that it seeks to satisfy the bottomless inclinations of another, contrary to human humanity, to lead its spiritual world towards the deepest ravines of the abyss. Today's "mass culture", the idea of entertainment in which the mouths of destructive forces are frowned upon by a person's pleasure from the pleasures of life, gives his permission to the household by promoting pleasure, enjoyment wherever and as desired, not to return from anything along the way. The idea of Entertainment, which ultimately led the West to the verge of a spiritual abyss, is still a spiritual threat to the East today.

Modern living is good, it is not necessary to lag behind world development, but we must not forget who, what nationality we are. The appearance of a person is also considered one of the signs that indicate which nationality he belongs to and what kind of spirituality he owns. It is no secret that the increasing number of different spiritual threats leads to huge spiritual losses in some areas of the world today.

CONCLUSION

Today, humanity has achieved tremendous success. His thinking is moving towards infinity. The remote koinotu is looking for news from the abyss of the Earth. As consciousness and thinking grew, we were insisting at the beginning of our topic that, unfortunately, various vices and subversions aimed at removing other people's lives continue in human spirituality. Continuing our opinion about this, it can be said that in reality it is a long struggle between confrontation, goodness and evil. And man is the victim of a long struggle between these two poles. He has already realized this struggle between the goodness and subversion of the world, but, having realized, unfortunately, he himself has become an active participant in this struggle, a thing to destroy each other, leads each other towards degradation. The perverted Goya created by man are able to load the Earth's Kurra not one, but several times. Today it is necessary to take a very ambitious step. Nurturing goodness in the hearts of young people is a pledge to preserve the purity and national spirituality of their spirituality. Only a people with their own national spirituality, culture can sustain themselves as a people, a nation.
